

# VECTOR CONSULTING GROUP, LLC

2-DAY BALLISTIC SHIELD END-USER COURSE

**COURSE RESTRICTION: LE / MIL / GOV**

This 2-day performance-driven ballistic shield course will merge shooting, tactics, and shield applications - to challenge the legacy approach to ballistic shield training. In this course, students will perform various drills that focus on the mechanics of running the handgun while problem solving behind the ballistic shield. Mechanics such as: one-handed shooting, framing, reloads and malfunctions, movement, light use, etc.

In addition to mechanics, students will learn how to work the ballistic shield in-conjunction with their environment. Students will perform a series of live-fire and/or NLTA drills - in and around vehicles and/or structures, in both day-light and low-light lighting conditions. *Host facility capabilities will dictate.*

This course is physically and mentally demanding and is designed for officers seeking a practical, defensible approach to ballistic shield deployment.

**COURSE RESTRICTION: LE / MIL / GOV**

**Time/Date:**

November 19th, 2026 (0900-1700)

November 20th, 2026 (1400-2200)
