

VECTOR CONSULTING GROUP, LLC

2-DAY LOWLIGHT HANDGUN COURSE

DRK-HG is a 2-day accelerated shooting course designed to address the realities of lethal encounters in reduced-light environments. This course focuses on building performance as it relates to **VISION** (seeing), **COGNITION** (problem-solving), and **RESPONSE** (shooting).

This class is designed specifically for law enforcement professionals who want to elevate their skills in lowlight environments.

In this course students will get plenty of hands-on reps with the handheld and weapon-mounted light, in conjunction with both the handgun and carbine.

This course will not only push the student to increase their performance on guns and lights, but also performance as it relates to the visual and cognitive demands of lowlight engagements - which is the most probable engagement for LEOs in the U.S.

COURSE RESTRICTION: LE / MIL / GOV
