

VIDEO SURVEILLANCE FOR DRUG AND BORDER INVESTIGATIONS

COURSE OVERVIEW

This three-day course teaches the techniques and skills needed to record surveillance video with camcorders and other video equipment. Students will be exposed to state-of-the-art covert video surveillance systems and will be offered the opportunity to use them in realistic hands-on scenarios. The course will focus on both camcorder surveillance and covert video recording systems. It will include how to plan a successful video surveillance and the situational awareness necessary for safe operations.

A night session will show participants multiple techniques for recording surveillance video in low-light and no-light conditions. Participants will learn how to link the audio from covert audio transmitters to their camcorders. Participants will practice using professional microphones with camcorders to record confessions, eyewitness accounts, and victim statements.

Numerous hands-on exercises give students an opportunity to practice these techniques in the field.

REQUIRED EQUIPMENT

Instructor-provided equipment is available for all students. Students are encouraged to bring department-issued camcorders, DSLR cameras, night vision devices, and/or covert audio and video devices.
